Bernie Hayden

AGA Audio Conference – *"Those Faint Signals: Learning to Catch Ethical Slippage Before It's Too Late."* AGA, in conjunction with the National Association of State Auditors, Comptrollers and Treasurers (NASACT) and the Association of Local Government Auditors (ALGA), is pleased to announce a new and increasingly important topic to our audio conference schedule – cases of ethical lapses.

During this audio conference, the presenter will recount some recent ethical lapses in government and examine the causes and effects. By examining a series of ethical lapses, we find that a pattern emerges. That pattern allows us to think about this question: What is it in the culture of an agency that allows obvious ethical breaches to occur and continue? Once we understand the culture, we can think about putting the detection methods, as well as antidotes, in place.

Marianne M. Jennings, JD, Professor in the Department of Management in the W.P. Carey School of Business at Arizona State University (ASU).
